68% interval, upper bound ≥ 0.66
68% interval, upper bound < 0.66
95% interval, upper bound ≥ 0.94
95% interval, upper bound < 0.94
signal rate lowered by about 10% with a weak $E_{\text{avail}}$ slope: upper bound below the gate for 51 (68%) and 42 (95%) of 153
($E_{\text{avail}}$, $W$) cells 0–41 and their sum
109 coarse joint cells, by index in the $3^5$ grid
